Optum

FHIR Layer Exchange Release Notes

Optum Behavioral Health Data Exchange for
Optum Idaho County

Release: #3.8| Date: Feb 28, 2024

A. **New and Improved**
  a. **Access Management**
     i. **Admin Portal**
        1. No Changes in this release
     ii. **Vendor Portal**
        1. No Changes in this release
     iii. **Member Portal**
        1. No Changes in this release
     iv. **Authorization/Authentication**
        1. Upgraded Redis version to use enhanced encryption

  b. **Framework**
     i. **Flex Server**
        1. Upgraded Redis version to use enhanced encryption
        2. Updated Actuator Info Endpoint to show appropriate Operational Information of the Running Application

  c. **Patient Access APIs**
     i. **Patient Claims**
        1. Implementation Guide: CARIN for Blue Button®
           http://hl7.org/fhir/us/carin-bb/

2. FLEX updated the CARIN BB from 1.1 to 2.0 to allow for the vision and dental claims functionality.

d. Public Directory APIs

  i. **Provider Directory**

  1. Implementation Guide: PDEX Payer Network
     https://build.fhir.org/ig/HL7/davinci-pdex-plan-net/
  2. getPageOffSet and include parameter has been removed from provider directory resource's "Location", "Practitioner" & "Practitioner Role" as the backend source system is not supporting the same. If user was trying to get a specific record, backend source system was not supporting the same, hence it has been removed.

     Impact: User will now not see any error while trying to perform offset action.

  3. The PSAAS URL being used as a data source was upgraded to a new URL. The new URL was implemented in both lower and production environments

     Impact: No impact to user

B. Bug Fixes

  i. Latest Security updates and vulnerability fixes.
