	Rating Scale: NA = Not Applicable Y = Yes N = No	Υ	N	NA
Assessment				
1	Each member has a separate record.			
2	Each record includes the member's address, employer or school, home and work telephone numbers including emergency contacts, relationship or legal status, and guardianship information if relevant.			
3	All entries in the record include the responsible service provider's name, professional degree and relevant identification number, if applicable, and dated and signed (including electronic signature for EMR systems) where appropriate.			
4	A DSM primary treatment diagnosis is in the record.			
5	A complete clinical case formulation is documented in the record (e.g., primary diagnosis, medical conditions, psychosocial and environmental factors and functional impairments.			
6	The presenting problem and conditions are documented.			

7	A behavioral health history is in the record.		
8	The behavioral health treatment history includes the following information: dates and providers of previous treatment, and therapeutic interventions and responses.		
		<u> </u>	
9	The behavioral health treatment history includes family history information.		
		•	
10	A medical history is in the record.		
-			
	The westign brooks out history includes the following information, transport and additions determined and westiday.		
	The medical treatment history includes the following information: known medical conditions, dates and providers of previous treatment, current treating clinicians, and current therapeutic interventions and responses.		
11			
	The medical treatment history includes family history information.		
12			
	Was a current medical condition identified? This is a non-scored question. (If #10 is N, then #13 is N/A)		
13			
	·	·	
	If a medical condition was identified, there is documentation that communication/collaboration with the treating		
14	medical clinician occurred. This is a non-scored question.		
15	If a medical condition was identified, there is documentation that the member/guardian refused consent for the release of information to the treating medical clinician. This is a non-scored question.

Progress Notes			
75	For all Outpatient Services: All progress notes document the start and stop times for each session when a timed CPT Code is used.		
76	For all Outpatient Services: All progress notes document clearly who is in attendance during each session.		
		<u> </u>	
77	For all Outpatient Services: All progress notes include documentation of the billing code, or the specific service, that was provided.		

78	The progress note indicates the type of intervention that was used for the session.	
70		
	The progress notes reflect reassessments when necessary.	
79		
80	The progress notes reflect on-going risk assessments (including but not limited to suicide, homicide, and dangerous behaviors) and monitoring of any at risk situations.	
81	The progress notes describe/list member needs and strengths and how those impact treatment.	
		<u> </u>
	The progress notes describe progress or lack of progress towards treatment plan goals.	1
82		
83	The progress notes document any referrals made to other clinicians, agencies, and/or therapeutic services when indicated.	
84	The progress notes document the use of any preventive services (relapse prevention, stress management, wellness programs and referrals to community resources).	
	· · · · · · · · · · · · · · · · · · ·	
85	If the member is on medication, there is evidence of medication monitoring in the treatment record. (physicians and nurses)	
	·	
86	When a primary care physician is identified, there is evidence the prescriber coordinated care within 14 calendar days after initiation of a new medication. <i>This is a non-scored question.</i>	
	If there is evidence of coordination of care outside of 14 calendar days, document how many days after initiation the coordination took place.	•

	There is documentation that indicates the member understands and consents to the medication used in		
87	treatment.		
		•	=
	For children and adolescents documentation indicates the responsible family member or guardian understands		
88	and consents to the medication used in treatment.		
	Each record indicates what medications have been prescribed, the dosages of each, and the dates of initial		
89	prescription or refills.		
	When lab work is ordered, there is evidence the lab results were received and reviewed by the provider.		
90			
	When lab work is ordered, there is evidence that the provider reviewed the results with the member.		
91			
	The progress notes document the dates of follow up appointments.		
92			
	The progress notes document when members miss appointments.		
93			
	When a member misses an appointment, there is documentation of outreach efforts (phone calls, missed		
94	appointment letters) the provider makes to reengage the member in treatment.		
Transition of Care	Was the member transferred/discharged to another clinician or program? This is a non-scored question.		
95	was the member transferred/discharged to another dimidian of program: This is a non-scored question.		
95			

96	If the member was transferred/discharged to another clinician or program, there is documentation that communication/collaboration occurred with the receiving clinician/program.	
97	If the member was transferred/discharged to another clinician or program, there is documentation that the member/guardian refused consent for release of information to the receiving clinician/program.	
98	The reason for discharge is clearly identified.	
99	The discharge plan summarizes the reason(s) for treatment and the extent to which treatment goals were met.	
100	The discharge/aftercare plan describes specific follow up activities.	
Treatment Records	Treatment records are completed within 30 days following discharge.	
102	The record is clearly legible to someone other than the writer.	
103	When appropriate there is evidence of supervisory oversight of the treatment record. (Records are reviewed on a regular basis with appropriate actions taken.)	
Education 104	There is documentation that the provider offers education to members/families about care options, participation in care and coping with behavioral health problems.	

	There is documentation that the provider offers education to members/families about prognosis and outcomes.	I
105		
	FOR ANY IHCBS SERVICE(s): there is evidence that the parent/caregiver/guardian are willing to accept and cooperate with the program(s).	
106	cooperate with the program(s).	
	There is documentation that the risks of not participating in treatment are discussed with the member.
